### Understanding Translations

Entries may consist of headwords, parts of speech, the translation and/or definitions. Other forms of the word may follow the headword. After the translation or definition, you may see a list of usage examples.

### Explanation of Genders

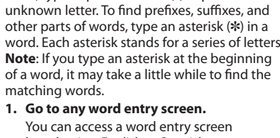

Spanish nouns are different than English nouns in that they must either be masculine or feminine. Each definition of a noun indicates which gender it is with *m* or *f*.

### Misspelling Words

If you enter a misspelled word, a list of corrections appears. Highlight the word you want and then press enter to see its entry.

### Choosing Multiple Forms

Some words in the dictionaries have more than one form (e.g. *sí*, *si*). When the word you are looking up has multiple forms, the different forms appear in a list.
Simply highlight the form you want and press enter to see its entry. For example, select *Spanish -> English* from the Books menu, then type *si* at the word entry screen.

Highlight the form you want and press enter to see its entry. To go back to the Multiple Forms list, press back.

### Accenting Letters

You can look up accented words without typing accents. If there are no Multiple Forms, the dictionary will take you directly to the word. If there are Multiple Forms, you will have to choose the correct word from a Multiple Forms list. See "Choosing Multiple Forms" for more information. Remember, if you want to enter an accent yourself, type the letter and press ▲ until the appropriate accent appears.

### 2.2 Highlighting Words

Another way to look up words in the Spanish-to-English and English-to-Spanish dictionaries is by highlighting them in entries or word lists. You can then find their translations or add them to *My Vocabulary List*.

1. **At any text, press** enter **to start the highlight.**

   To turn the highlight off, press back.
2. **Use the arrow keys to move the highlight to the word you want.**

| add word to *My Vocabulary List* | LIST |

3. **Press** clear **when done.**
   Press menu to go to the main menu.

### 2.3 Finding Letters in Words

If you are uncertain about how to spell a word, type a question mark (?) in place of each unknown letter. To find prefixes, suffixes, and other parts of words, type an asterisk (✻) in a word. Each asterisk stands for a series of letters.
**Note**: If you type an asterisk at the beginning of a word, it may take a little while to find the matching words.

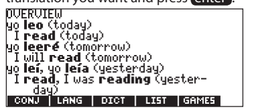

1. **Go to any word entry screen.**
   You can access a word entry screen by selecting *English -> Spanish*, *Spanish-> English*, or *English Dictionary* from the Books menu.

This will give you a good idea of each inflection form.
